

JOIN MOMENTUM ROBOTICS

WHAT IS MOMENTUM ROBOTICS?

Momentum Robotics is a new *FIRST* Robotics Competition team. We are a startup team that is looking for High School students interested in: science, technology, engineering, math, business and outreach. These students will have the chance to develop skills in these areas with guidance from mentors. They will collaborate to design and build a new robot every year and to do fundraising, branding and outreach. Momentum Robotics' workspace is on Sato Academy's campus and is supported by the Long Beach Unified School District.

FIRST ROBOTICS COMPETITION

The *FIRST* Robotics Competition is a worldwide competition that is run out of the organization *FIRST*. High School aged students around the world build a robot in a six week period starting in January that best fit the requirements of the new game. After the rigorous six week period is up, teams go to their chosen regionals between March and April and compete to go to the championships. This competition offers students the opportunity to learn in a fun and competitive environment where they have support from friends and mentors to grow.

ARE YOU INTERESTED?

If you are interested in joining, or would like to check it out please email momentumrobotics@gmail.com with your name, school, grade, and email address. Momentum Robotics is based in Sato Academy at 1100 Iroquois Ave. Long Beach, CA. The Co-Captains are Matthew Crane and Thena Guttieri.
